I verily believe the original patent to be partially or wholly inoperative on the grounds that the patent claims less than we had a right to claim. The claims are partially inoperative in failing to cover all embodiments of our invention. For example, claim 1 and claim 11 unnecessarily require "monitoring an external time spent by the CPU." This limitation is not necessary to distinguish these claims from the prior art or to make these claims definite. These errors arose in the prosecution of the original application, which resulted in the issuance of the patent. The attorney prosecuting the original application failed to appreciate the scope of the invention, and thus, limited the claims as indicated above. Therefore, we hereby indicate a desire to seek added claims as indicated in the Preliminary
